

ALUMINUM BRAKE CALIPER WASHER

MACHINE SOLD: AQF-212; gas heat, wash/rinse/dry, ambient blow off with guide rails.

PART PROFILE/CONTAMINANT: Aluminum brake calipers, contaminated with coolant and chips. Run two lanes of calipers using internal support rails to keep parts upright. Completely clean and dry parts required. Parts must be cooled down to approximately 105*110 F at exit, thus the ambient blow off at unload.
